RISK MINIMISATION PLAN - strategies to avoid triggers (prepared by parents and service)

- Anaphylaxis, Asthma and first aid trained Educators are on the premises at all times.
- The medical management plan, risk minimisation plan and medication are accessible to all educators. Discussions to explain where these items are kept are held with Parents, Educators and Volunteers.
- The child's and service medication is stored in the prescribed location for the service.
- The child's medication will be checked to ensure it is current and has not expired.
- There is a notification of child at risk of Anaphylaxis displayed in the front foyer with other prescribedinformation.
- The Nominated Supervisor will identify all children with specific health care needs, allergies or diagnosed medical conditions to all new educators, staff, volunteers and students, and ensure they know the location of the child's medical management plan, risk minimisation plan and medication.
- Parents are required to authorise administration of medication on a medication record, and Educators will complete administration of medication record whenever medication is administered.
- A copy of parent's authorisation to administer medication is attached to medical management plan and original filed in child file.
- The Nominated Supervisor will discuss with the parents of any allergens that pose a risk to the child.
- The service will display the child's picture, first name, medication held and location, and brief description of medical condition on a poster/schedule in a prominent place to alert all staff, volunteers and students.
